Comments pertaining to 512 North State Rd. In no special order.

After visiting the parking lot of 512 North State Rd I feel the taking down of existing trees and replanting with a hedge of ever greens will not solve the line of sight issue from the window of #2 Blue Lantern.

The window is at the second story of the house, someone standing at the window, looking out, their line of sight would be approximately 15' above the ground. This viewer will be looking **over** a planted hedge for some time.

I suggest taking down the declining Ash (in line with the window), grinding the stump and planting another tall White Pine.

Additional evergreen species could be planted in between existing trees if space allows. In addition to the White Pines, others to consider are: Red Cedar, American Holly, Arborvitae and White Spruce.

Keeping the existing trees will give the area a much more natural look.

Any questions or discussion give me a call.
