RE: Possible change in Retaining wall materials for 64 Hawkes Avenue

Dear Board Members,

My name is Luigi Rogliano, and I am the builder of the new residence going up at 64 Hawkes Avenue. I am writing you because I am requesting to change the proposed site retaining wall material from rubble stone retaining walls to a residential segmental block retaining wall system by Libertystone for the proposed retaining wall at 64 Hawkes. The proposed walls would remain in the same location and the same size just the materials would be different. Please see that I have provided product data on the proposed libertystone walls as well as some picture of libertystone walls we have recently completed. We are requesting the change in materials because we believe that it will provide a cleaner more uniform appearance compared to rubblestone walls. Thank you for your attention to this matter, please feel free to call or reach out to me with any questions at the number below.

Sincerely,

Luigi Rogliano
