Email copy, 10/28/2026

Good evening Sandy,

Attached in this email we have the updated prints and renderings based on everything discussed at the meeting this month.

Windows have been added to both garage side and livable side on both the first and second floor.

The landscaping has been updated with all trees, shrubs and flowers directly from the approved list you provided me.

The shutters were removed from the house

Attached is a full color detail of the front, both sides and rear of the proposed home.

The exact light fixtures that will be used in the front and rear of the house is on the detail sheet, they will be 3000K color temperature.

The exposed foundation will be finished in a light grey stucco, the detail is attached to the drawings as well.

The catch basin has also been moved out of the state easement as per Jons helpful comment during the meeting.

I believe this is everything that was mentioned in the meeting from my notes, if there is anything else you need please do not hesitate to reach out as always.

Thank you so much

Chris Mastroianni
